OUR IDENTITY

PVC FREE for over 10 years

For over 10 years we have been producing products without PVC, PBT or halogen additives.

100% MADE IN ITALY

Goods completely realized in Italy, from raw materials to finished products.

GREEN COMPANY

We are a Company with a low environmental impact, able to offer eco-friendly products.

RENEWABLE **ENERGY** SELF-PRODUCED

Low impact energetic production thanks to our 100kw photovoltaic system.

ZERO WASTE

Recycling production waste by producing materials for non-sanitary uses.

REMADE IN ITALY

Aluminium waste is recycled according to REMADE IN ITALY certification, offering CAM-COMPLIANT products.

EUROPEAN FIRE RATING

Life-blend® is certified according to European standard procedure given by EN 13501-1 references, reaching euroclass fire rating of "Bs 1 D0", the best for plastic materials.

NON-TOXIC FUMES

Life-blend® is designed to avoid the emission of toxic fumes being PVC-free, it does not contain halogen, bromine, chlorine and phthalates.

SELF EXTINGUISHING

Life-blend® is a self-extinguishing material, it does not contain brominated or halogenated retardants

CHEMICALS RESISTANT

Life-blend® ensures a high-level resistance to chemical agents.

UV RESISTANT

Life-blend® is stabilized and highly resistant to UV and aging.

HIGH-IMPACT TESTED

Life-blend® products are designed to withstand impacts, scratches and gouges.

ECO-FRIENDLY AND RECYCLABLE

Life-blend® products are designed to be recycled at the end of their life cycle.

SUSTAINABILITY

In order to reduce environmental impact and improve eco-sustainability, Styla products achieved REMADE IN ITALY certification, ensuring the use of recycled aluminium in its products.

MEDICAL USE CERTIFIED

Life-Blend® is suitable in medical field since it is bacteriostatic (they prevent bacterial proliferation). The bactericide version is also available on request (they actively eliminate the bacterial load from their surface).

EASY CLEAN

Life-blend® is an easy to clean, non porous material.

NON-TOXIC

Life-Blend® doesn't harm people health being VOC certified (it doesn't emit dangerous volatile organic compounds*).

* Formaldehyde, acetaldehyde, toluene, tetrachloroethylene, xylene isomers, trimethylbenzene, dichlorobenzene, ethylbenzene, butoxyethanol, styrene, benzene, trichloroethylene.

BACTERICIDE and BACTERIOSTATIC

life - blend®

Viruses and bacteria are usually present on surfaces and represent a huge risk for health, especially in the medical field.

Life-blend® offers a valid help against infections thanks to its BACTERIOSTATIC AND BACTERICIDE formulation.

COMMON SURFACES

Common surfaces don't act as a barrier against bacteria proliferation.

Life-blend® BACTERIOSTATIC

Being BACTERIOSTATIC, Life-blend® is suitable to be used in the medical field, stopping bacteria proliferation on surfaces.

Life-blend® BACTERICIDE

Life-blend® is also available in the BACTERICIDE version, which is able to eliminate all the bacterial load present on his surface thanks to the use of an ISO 22196:2011 certified silver ion additive.*

This formulation can be a strong ally in prevention of hospital infections and in all areas that need a constant and perfect hygienization.

* Against common organisms such as: Campylobacter, E. coli, Listeria, MRSA, Pseudomonas, Salmonella.

The growth of this bacteria is proved to be reduced up as 99,99%.

FIRE REACTION: LET'S TALK ABOUT IT

In the wall protection field, the legislation about Fire reactions is one of the most important; but, what are the meanings of all acronyms we see on products?

Let's make things clear:

First of all there are two different main legislations, the US and the EUROPEAN one:

- The US legislation is based on UL 94 flammability standard, ranging from HB (slow burning on a horizontal part) to V0 (burning stop within 10 seconds).
- The European legislation (EN 13501-1) has three main indicators:
 - 1) Combustibility, from A (incombustible) to F (combustible and easy flammable);
 - 2) Fumes production, from S1 (low on fumes production) to S3 (no limit on fumes production);
 - 3) Dripping, from D0 (no drip or firewalls) to D2 (no limit on dripping or firewalls).

To guarantee the highest quality and safety, Styla only produces its wall protections with the highest certification possible for plastic materials :

	B	S1	D0
EUROPE:	The HIGHEST resistance to FIRE	The LOWEST fumes emission.	NON flammable particles

CE MARKING

CE marking is a guarantee of quality and respect of European legislations.

Our SH wall sheets comply with all European regulations about wall protections (EN 15102:2007+A1:2011) to guarantee our customers a safe and non-toxic product free from substances such as vinyl, heavy metals and formaldehyde.

LIFE-BLEND® and PVC comparing: they seem similar but...

These days we are surrounded by infinity of plastic goods, but only few people know that with "plastic" is meant an endless variety of very different molecules. In the Wall protection world, PVC (polyvinylchloride) is one of the most used materials, being able to reach great fire resistance results at an affordable price.

However, there is a problem.

PVC, during combustion, releases hydrochloric acid molecules (HCL) and chlorine acid atoms, extremely toxic for humans if inhaled.

Compounding all this is the fact that to enhance the

characteristic of PVC, is common to add halogens and fluorides. These molecules improve its fire resistance as well as being extremely toxic.

To overcome these hazards, Styla has decided to use Life-Blend, a special blend of polycarbonate (PC) not containing chlorine or other chemicals dangerous for humans and the environment. All this in order to obtain a safe and an environmental friendly product.

DO YOU WISH THE WARMTH OF A WOODEN PRODUCT BUT YOU NEED MEDICAL GUARANTEES AND A BETTER FIRE RESISTANCE?

Finally we can combine wooden and textured finishes with the versatility of modern wall protections systems.

These innovative products offer the same medical guarantees (bacteriostatic and bactericide) and characteristics as the Life-Blend® solid colour ones , as well as being ecological, recyclable and easy to clean.

UNIQUE PRODUCTS WITH REALISTIC EFFECTS

This particular technology can be applied both on profiles and on whole components, perfectly reproducing the 3D texture over the component without any seams.

For a better realism, this innovative DIP PRINT® technology can create uniques and original pieces, since the decoration will appear a little different on every element avoiding the creation of clones, like the traditional print or pad printing.

Life-blend® DIP PRINT® is available for:

WHL.40	WOOD EFFECT LIGHT HANDRAIL	Page 38
WBH.170	WOOD EFFECT BUMPER HANDRAILS	Page 52
WB.125	WOOD EFFECT BUMPER GUARDS	Page 58
WCGL.25	WOOD EFFECT CORNER GUARDS	Page 78

DIP PRINT®

COLORING ONLY WITH WATER STRENGHT

To create its wood effect products, Styla employs the DIP PRINT® technology.

During the immersion in the tank through **hydrostatic pressure**, a **thin layer of inks** completely wraps the profiles and components. This unique kind of technology allows the finishing of all profiles in their entirety, perfectly reproducing any wood, metallic, marbled and decorative texture.

Styla choose this process according to its company policy, where the **products quality** has the priority, as well as their **eco-sustainability**.

QUALITY

At first, the DIP PRINT® technology was born to fulfil the nautical furniture requests, where the furniture perfection must be joined by furniture lightness. DIP PRINT® technology assures great realistic results, both on bars and accessories, without any anaesthetic wrinkles or adapted cuts.

ECO-SUNSTAINABILITY AND SECURITY

The DIP PRINT® process creates very little waste and don't use environmental dangerous compounds. Therefore, every product is completely safe in any fire critic situations.

WE DON'T USE PVC FILMS

Unlike other competitors, Styla offers wall protection with superiors finishes without the use of PVC films: these ones, even though they are cheaper, have a low final yield quality.

ENDLESS CHROMATIC COMBINATIONS

To obtain vibrant and pleasant chromatic combinations, you can choose from our wide color range. With the right combinations you can achieve different and sophisticated final effects: elegant and refined, modern or classic, color coordinated delicate compositions, classic solid color or impactful chromatic contrasts.

The color rendering in this catalogue is for guidance only; please refer to our physical color swatches.

Custom finishes on request.

WALL SHEETS AND STRIPES

Protection, Creativity and Design.

This is what Styla wall sheets and stripes offer.

Ideal to offer a valid protection to furnish rooms and areas.

Life-blend® protection wall sheets, non-toxic and antibacterial, available in different sizes.

SH

SIMPLICITY AND ELEGANCE

Styla wall sheets are the best solution to protect walls. Available in the Styla range of colors, they allow the creation of a continuous coating, compatible with all the other Styla products.

DC | DH

DOOR AND HANDLES AREAS PROTECTION

Protective elements coming from the Life-Blend® sheets trim, non-toxic and antibacterial. Total or partial door wrapping. On request, is possible to totally or partially wrap the doorjamb.

SHP

CREATIVITY AND INNOVATION

Life-blend® wall protection to secure your walls: transparent, non-toxic and antibacterial, available in different dimension and decorated with high quality digital print on the inside: there's no limit to creativity!

SK.100

FOR THE FINISH OF YOUR ENVIRONMENTS

The Styla skirting board in Life-Blend is perfect for completing your sanitary environments, guaranteeing maximum hygiene and resistance. Available in the entire Styla color range, it is perfectly compatible with SH and SHP sheets, guaranteeing a perfect wall finish.

HANDRAIL

H.40

Life-blend® PVC Free

With a classic and sturdy design, the H.40 handrail with aluminium core, \varnothing 40 mm handle and tubular wall brackets in Life-Blend, is ideal for a strong wall support, thanks to the 3-hole plate fixing for both end-caps and wall brackets. Can also be installed on plasterboard walls with double sheet.

SMOOTH FINISH

Handrail with a smooth finish to guarantee perfect hygiene and cleanliness.

CONTINUOUS PROFILE

Various accessories available to offer a continuous and sturdy bar, in aluminium wrapped with Life-blend®, to ensure the highest sustain and security in your stairs and hallways.

BOTTOM CLOSURE

Various accessories available to offer a continuous and sturdy bar, in aluminium wrapped with Life-blend®, to ensure the highest sustain and security in your stairs and hallways.

HANDRAIL HWS.34

WOOD – STAINLESS STEEL

Realized in ash wood with brushed stainless steel wall brackets, this handrail comes in 34 mm diameter completed with stainless steel AISI 304 brackets and endcaps. This item is perfect for any environment where the warm and value of real wood is needed.

It can also be installed on double-plate plasterboard wall.

This product is supplied cut to size.

SMOOTH FINISH

Refined handrail with a smooth finish to guarantee a better hygiene and cleanliness.

CONTINUOUS PROFILE

Many accessories available to offer a sturdy and continuous supporting bar, in varnished ash wood, to guarantee the highest security and sustain in your hallways.

BOTTOM CLOSURE

The horizontal handrail bar is free from the bottom closure profile to guarantee a secure handle and a better surface cleaning.

ASH WOOD

The Styla handrail is made of ash wood to ensure maximum resistance to wear and tear over time.

STANDARD LENGHT AND FIXING

- Maximum bar length: 2,5 mt
- Maximum wheelbase between brackets: 850 mm
- A reinforcement in plasterboard wall is recommended.

HANDRAIL HS.34

STAINLESS STEEL

If the maximum resistance is needed, the HS.34 handrail with a 34 mm of diameter is the perfect choice because it is completely realized in satinated AISI 304 stainless steel.

It can also be installed on double-plate plasterboard wall.

This product is supplied cut to size.

SMOOTH FINISH

Refined handrail with a satinated and smooth finish to guarantee a better hygiene and cleanliness.

CONTINUOUS PROFILE

Many accessories available to offer a sturdy and continuous supporting bar, in AISI 304 stainless steel, to guarantee the highest security and sustain in your hallways.

BOTTOM CLOSURE

The horizontal handrail bar is free from the bottom closure profile to guarantee a secure handle and a better surface cleaning.

STANDARD LENGHT AND FIXING

- Maximum bar lenght: 6 mt
- Maximum wheelbase between brackets: 950 mm
- A reinforcement in plasterboard wall is recommended.

GREAT RESISTANCE

A Stainless steel (AISI 304) brackets, with satin finish and 3 anchor screws.

B Curved end caps in stainless steel (AISI 304) with a satin finish.

CONTINUOUS HANDRAIL

C Curved end caps in satinated stainless steel (AISI 304).

D External and internal satinated stainless steel angles.

Stainless steel AISI 304 with satin finish.

BUMPER HANDRAILS

The bumper handrail is ideal in hallways where the passage of people and trolleys implies the need for support for walking and at the same time a valid protection of the walls from accidental impacts. If you are looking for a solid wall protection combined with a comfortable and secure grip, without giving up a modern design, Styla bumper handrail is the solution.

BH.140

CLASSIC DESIGN AND STRENGTH

A classical designed bumper handrail (h 160mm) in Life-blend®, with a slightly embossed finish for a better resistance to scratches ensuring a perfect hygiene and cleanliness.

Solid colors available in the Life-blend® color range.

BH.170

BICOLOR REFINED

A refined Life-blend® bumper handrail (h 170mm). To ensure a perfect hygiene and scratching resistance, a smooth finish for the handrail and a slight embossing on the bumper, has been chosen for this item.

For this product, is possible to choose a different color for the handrail and the bumper to create endless combinations that would enhance the product's personality and elegance. Available on all Life-blend® color range.

WBH.170

STYLISH WOODEN FINISH

A refined Life-blend® handrail bumper (h 170mm).

To ensure a perfect hygiene and scratching resistance, a smooth finish for the handrail and a slight embossing on the bumper, has been chosen for this item.

For this product, is possible to choose a wooden effect for the handrail to create endless combinations that would enhance the product's personality and elegance.

Available on all Life-blend® color range.

BH.140.ANTILIG

ANTI LIGATURE SAFETY

Bumper handrail h 140 mm in Life-blend® with a classic design. Aluminum profile support designed to prevent patients from harming themselves.

B.170.ANTILIG

BUMPER

Equipping your building with bumpers means ensuring a reliable protection on hallways and walls subjected to wear and a reliable prevention over impacts caused by trolleys, greatly reducing maintenance costs.

Our bumpers are available in a variety of materials and designs, according to the type of protection needed.

Also they have a broad range of shapes (rectangular, triangular and convex) and colors to be placed discreetly in every environment.

B.110

TRIANGULAR SECTION, MINIMALISTIC

A small sized bumper, with a Life-Blend® cover, suitable for mid intensity impacts completed with a bottom continuous aluminium retainer (for increased strength and stability).

B.125 | WB.125 | B.200

CONVEX SECTION, FOR A REFINED DESIGN

Refined bumper with a Life-blend® cover, suitable for high intensity impacts completed with a bottom continuous aluminium retainer (for strength and stability).

P.200 | P.200L

RECTANGULAR SECTION

The most classic bumper with a rectangular Life-blend® cover, suitable for mid-high intensity impacts completed or with a bottom continuous aluminium retainer or, in a lighter version, with fixing aluminium brackets.

HC.250

EPDM RUBBER, FOR "VERY STRONG" IMPACTS

Highest protection over extremely heavy impacts. Ideal on all those areas where forklifts, trucks and vehicles are moving.

ITEM SPECIFICATIONS

AHL.40

LIGHT HANDRAIL ALU Code AHL.40

Supply and installation of a newly developed, non-toxic, antibacterial 40 mm diameter handrail, with a strong grip even on double sheet plasterboard.
Composed of:

CORRIMANO AHL 40	
Certificazione sul contenuto di riciclato e/o sottoprodotto	
Stylia Srl Via Indro Montanelli, 23	
≥ 95%	A*
≥ 85% - 95%	A
≥ 55% - 85%	B
< 55%	C
tipologia materiale riciclato: Alluminio	
Elaborazioni a cura di ReMade in Italy (vedi nei rapporti di certificazione)	
Indicatore dei consumi energetici del riciclo (kg/kg)	12,1
Indicatore delle emissioni climalteranti del riciclo (kg CO ₂ eq/kg)	2,01
altre certificazioni ambientali:	
www.remadeinitaly.it	

- A tubular profile with a 40 mm of diameter, shock-resistant plastic design of new concept LIFE-BLEND® Certified European EN 1382 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purpose, with a thickness of 2 mm.
- With a smooth finish for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall using special brackets, manufactured with the same LIFE-BLEND® material, with two self-centering holes over 38 mm distant from each other for a strong hold on any wall even on a double sheet drywall and has a distance of 57 mm from the wall for a perfect hand-grip.
- Complete with end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the cover, manufactured with the same LIFE-BLEND® material.
- Remade in Italy certified product of 45% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal, 1.5 aluminum supports).

B.110

BUMPER GUARDS Code B.110

Supply and installation of elliptical, newly developed, non-toxic, antibacterial, 110 mm high elastic shock-absorbing bumper guards.
Composed of:

PARACOLPO B 110	
Certificazione sul contenuto di riciclato e/o sottoprodotto	
Stylia Srl Via Indro Montanelli, 23	
≥ 95%	A*
≥ 85% - 95%	A
≥ 55% - 85%	B
< 55%	C

Indicatore delle emissioni climalteranti del riciclo (kg CO ₂ eq/kg)	1,18
altre certificazioni ambientali:	
www.remadeinitaly.it	

- A 110 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Pre-colored plastic material, does not contain cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, and is amalgamated into the mass of the material.
- Everything is snapped on mounted onto an extruded aluminum profile with high structural rigidity and seamless for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps external dovetailed, self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and cover in Life-Blend, 1 terminal in Life-Blend, 1.5 supports in Life-Blend).

B.125

BUMPER GUARDS Code B.125

Supply and installation of elliptical, newly developed, non-toxic, antibacterial, 125 mm high elastic shock-absorbing bumper guards.
Composed of:

PARACOLPO B 125	
Certificazione sul contenuto di riciclato e/o sottoprodotto	
Stylia Srl Via Indro Montanelli, 23	
≥ 95%	A*
≥ 85% - 95%	A

Indicatore delle emissioni climalteranti del riciclo (kg CO ₂ eq/kg)	1,18
altre certificazioni ambientali:	
www.remadeinitaly.it	

- An elliptical 125 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps and/or external self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

B.200

BUMPER GUARDS Code B.200

Supply and installation of elliptical, newly developed, non-toxic, antibacterial, 200 mm high elastic shock-absorbing bumper guards.

Composed of:

- An elliptical 200 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps and/or external self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 45% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

BH.140

BUMPERS HANDRAIL Code BH.140

Supply and installation of a newly developed, non-toxic, antibacterial 140 mm high elastic shock-absorbing bumpers handrail.

Composed of:

- Newly developed, shock-resistant LIFE-BLEND® plastic profile 140 mm high. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect hand-grip.
- Mounted on the wall using special brackets with a pair of self-centering offset holes, over 63 mm distant from each other for a strong grip on any wall, even on a double sheet drywall, made of the same LIFE-BLEND® material and distant 52 mm from the wall for a perfect hand-grip.
- Complete with end caps, internal or external dovetailed self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 35% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and cover in Life-Blend, 1 terminal in Life-Blend, 1.5 supports in Life-Blend).

BH.170

BUMPER HANDRAIL Code BH.170

Supply and installation of a newly developed, non-toxic, antibacterial 170 mm high elastic shock-absorbing bumper handrail.

Composed of:

- A tubular 40 mm profile with a diameter and an elliptical 125 mm wide profile with a newly developed shock-resistant LIFE-BLEND® plastic design. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- A colored insert link with a 1,5 mm of thickness between the handrail and the bumper of the same newly developed shock-resistant LIFE-BLEND® plastic material.
- With a smooth finishing on the handrail and fine embossing on the bumper for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect hand-grip.
- Mounted on the wall using special brackets with a pair of self-centering offset holes, over 63 mm distant from each other for a strong grip on any wall, even on a double sheet drywall, made of the same LIFE-BLEND® material and distant 60 mm from the wall for a perfect hand-grip.
- Complete with end caps and external dovetailed, self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one barra da 1 metro di alluminio e cover in Life-Blend, 1 terminale in Life-Blend, 1,5 supporti in Life-Blend).

ITEM SPECIFICATIONS

BH.140 ANTI LIGATURE BUMPERS HANDRAIL Code BH.140ANTILIG

ANTILIG

Supply and installation of new-concept anti-ligature handrails, non-toxic, antibacterial, with elastic shock absorption, with a height of not less than 140 mm.

Product characterized by:

- A 140 mm h shockproof profile in LIFE-BLEND® new concept plastic material, with European certification EN 13823ed EN ISO 11925-2 "B s1 d0" and antibacterial certification for medical use, with a thickness of 2 mm.
- With fine embossing for perfect hygienic-sanitary protection.
- Colored in paste, it must not contain cadmium and heavy metals, chlorine, phthalates, bromide, halogens and antimony.
- All snap-fitted onto an aluminum structural and support profile with closure of any space between the handrail and the wall, so as to make it impossible to hang from it and with a distance from the wall of 52 mm for perfect grasp.
- Complete with internal and external self-centering closure terminals and corners, fixed by interlocking in the support for perfect adherence to the cover itself, produced with the same LIFE-BLEND® material.

BH.170 ANTI LIGATURE BUMPERS HANDRAIL Code BH.170ANTILIG

ANTILIG

Supply and installation of new-concept anti-ligature handrails, non-toxic, antibacterial, with elastic shock absorption, with a height of not less than 170 mm.

Product characterized by:

- A tubular profile Ø 40 mm and a shockproof elliptical profile h 125 mm in newly developed LIFE-BLEND® plastic material, with European certification EN 13823 and EN ISO 11925-2 "B s1 d0" and antibacterial certification for medical use, with a thickness of 2mm.
- A colored connecting insert between the handrail and the bumper, made of new-concept LIFE-BLEND® plastic material, with a thickness of 1.5 mm.
- With a smooth finish on the handrail and a fine embossing on the bumper for perfect sanitary protection.
- Colored in paste, it must not contain cadmium and heavy metals, chlorine, phthalates, bromide, halogens and antimony. All snap-fitted onto an aluminum structural and support profile with closure of any space between the handrail and the wall, so as to make it impossible to hang from it and with a distance from the wall of 60 mm for perfect grasp.
- DIP-PRINT® finish wood effect or textured effect.
- Complete with self-centering closing terminals and external corners, fixed by interlocking in the support for perfect adherence to the cover itself, produced with the same LIFE-BLEND® material.

BS.100 STAINLESS STEEL BUMPERS Code BS.100

BS.100

Supply and installation of rectangular bumpers in satin finish AISI 304 stainless steel, with a height of no less than 100 mm.

Product characterized by:

- A rectangular profile h 100 mm in satin stainless steel AISI 304 with a thickness of 1.2 mm.
- Fixed to the wall with a steel bracket with overlapping holes, screws and dowels for a perfect seal even on walls with double plasterboard and underlying reinforcement.
- Complete with welded terminals to guarantee the closure and continuity of the profile.

BS.200 STAINLESS STEEL BUMPERS Code BS.200

Supply and installation of rectangular bumpers in satin finish AISI 304 stainless steel, with a height of not less than 200 mm.

Product characterized by:

- A rectangular profile h 200 mm in satin stainless steel AISI 304 with a thickness of 1.2 mm.
- Fixed to the wall with a steel bracket with overlapping holes, screws and dowels for a perfect seal even on walls with double plasterboard and underlying reinforcement.
- Complete with welded terminals to guarantee the closure and continuity of the profile.

CG.55 CORNER GUARDS Code CG.55

Supply and installation of a newly developed, non-toxic, antibacterial, elastic shock-absorbing,, 55 mm wide corner profile. Available heights: 1200 - 1500 - 2000 - 3000 mm

Composed of:

- A 55 mm wide corner bead, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect elastic shock-absorption.
- Mounted on the wall with anchor bolts for a safe structural strength even on walls with double sheet drywall.
- Can be mounted with specific lag screws.
- Complete with snap-on, self-centering end caps, for perfect sealing, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

CG.75 CORNER GUARDS Code CG.75

Supply and installation of a newly developed, non-toxic, antibacterial, elastic shock-absorbing, 75 mm wide corner profile. Available heights: 1200 - 1500 - 2000 - 3000 mm

Composed of:

- A 75 mm wide corner bead, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity a for a perfect elastic shock-absorption.
- Mounted on the wall with anchor bolts for a safe structural strength even on walls with double sheet drywall.
- Can be mounted with specific lag screws.
- Complete with snap-on, self-centering end caps, for perfect sealing, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

ITEM SPECIFICATIONS

CGL **LIGHT CORNER GUARDS protection** Code CGL.25 - CGL.50 - CGL.75 - CGL.100

Supply and installation of an antibacterial, non-toxic, shockproof, 50 or 75 or 100 mm wide corner profile. Available heights: 1200 - 1500 - 2000 - 3000 mm

Composed of:

- A 50 or 75 or 100 mm wide corner bead, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Mounted on the wall with appropriate glue suitable for a perfect seal.

CGS **STAINLESS STEEL CORNER GUARDS** Code CGS.50 - CGS.75

Supply and installation of corner guard in stainless steel AISI 304 brushed finish, 50 or 75 mm wide corner profile. Available heights: 1200 - 1500 - 2000 - 3000 mm

Composed of:

- A 50 or 75 mm wide corner bead, in stainless steel AISI 304, with a thickness of 1,5 mm.
- Mounted on the wall with appropriate glue suitable for a perfect seal

DC **DOOR COVERING** Code DC

Supply and installation of a newly developed, non-toxic, antibacterial door coverings sheets.

Composed of:

- Shockproof plastic wall covering sheets made of a newly developed LIFE-BLEND® material.
- Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 1,5 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Attached to the door with appropriate glue, suitable for a perfect seal.

DH

SEMI-CIRCULAR PROTECTION FOR DOOR HANDLE AREA

Code DH.600 - DH.500 - DH.400

Supplying and installation of a newly developed, shockproof, antibacterial, PVC-free, non-toxic plastic, semi-circular contoured sheets designed to protect the door handle area.
Composed of:

- Shockproof plastic wall covering sheets made of a newly developed LIFE-BLEND® material. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 1,5 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Mounted on the wall with appropriate glue, suitable for a perfect seal.

H.40

HANDRAIL Code H.40

Supply and installation of a newly developed, non-toxic, antibacterial 40 mm diameter handrail, with a strong grip even on double sheet plasterboard.

Composed of:

- A tubular profile with a 40 mm of diameter, shock-resistant plastic design of new concept LIFE-BLEND® Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purpose, with a thickness of 2 mm.
- With a smooth finish for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance. Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall using special brackets, manufactured with aluminium, with two self-centering holes over 47 mm distant from each other for a strong hold on any wall even on a double sheet drywall and has a distance of 57 mm from the wall for a perfect hand-grip.
- Complete with end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the cover, manufactured with the same LIFE-BLEND® material.
- Remade in Italy certified product of 35% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and cover in Life-Blend, 1 terminal in Life-Blend, 1.5 supports in Life-Blend).

HC.250

HEAVY CRASHRAIL Code HC.250

Supply and installation of crashrails made of black elastomer, with a honey-comb cross section structure, perfect for heavy-duty shocks.

Composed of:

- A 250 mm high and 9 mm thick crashrail in black elastomer ideal for high intensity impacts.
- Complete with special zinced steel end caps to protect the rubber profile from lateral crashes.

ITEM SPECIFICATIONS

HL.40

LIGHT HANDRAIL

Code HL.40

Supply and installation of a newly developed, non-toxic, antibacterial 40 mm diameter handrail, with a strong grip even on double sheet plasterboard.

Composed of:

- A tubular profile with a 40 mm of diameter, shock-resistant plastic design of new concept LIFE-BLEND® Certified European EN 1382 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purpose, with a thickness of 2 mm.
- With a smooth finish for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall using special brackets, manufactured with the same LIFE-BLEND® material, with two self-centering holes over 38 mm distant from each other for a strong hold on any wall even on a double sheet drywall and has a distance of 57 mm from the wall for a perfect hand-grip.
- Complete with end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the cover, manufactured with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and cover in Life-Blend, 1 terminal in Life-Blend, 1.5 supports in Life-Blend).

HS.34

STAINLESS STEEL HANDRAIL

Code HS.34

Supply and installation of a 34 mm diameter stainless steel handrail, with stainless steel endcaps and brackets, having a strong hold even on double sheet plasterboard.

Composed of:

- A stainless steel 34 mm diameter handrail.
- Mounted on the wall using special stainless steel brackets with three self-centering holes, over 38 mm distant from each other for a strong grip on any wall, even on a double sheet plasterboard, and distant 58 mm from the wall for a perfect hand-grip.
- Complete with stainless steel end caps and internal and/or external dovetailed, self-centering corners, inserted into the support for a perfect fit with the handrail.

HWS.34

HANDRAIL WOOD AND STAINLESS STEEL

Code HWS.34

Supply and installation of a 34 mm diameter ash timber handrail, with stainless steel endcaps and brackets, having a strong hold even on double sheet plasterboard.

Composed of:

- A 34 mm diameter varnished ash timber handrail.
- Mounted on the wall using special stainless steel brackets with three self-centering holes, over 38 mm distant from each other for a strong grip on any wall, even on a double sheet drywall, and distant 58 mm from the wall for a perfect hand-grip.
- Complete with stainless steel end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the timber (handrail).

P.200

RECTANGULAR BUMPER GUARDS Code P.200

Supply and installation of heavy, newly developed, rectangular, non-toxic, antibacterial, 200 mm high elastic shock-absorbing bumper guards.

Composed of:

- A rectangular 200 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps, internal or external dovetailed, self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 50% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

P.200L

RECTANGULAR BUMPER GUARDS Code P.200L

Supply and installation of heavy, newly developed, rectangular, non-toxic, antibacterial, 200 mm high elastic shock-absorbing bumper guards.

Composed of:

- A rectangular 200 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted on aluminium brackets with high structural rigidity for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps, internal or external dovetailed, self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.

SH

SHEETS STRIPES Code SH.25.1300 (cut stripes)

Code SH.T650-SH.T400-SH.T300-SH.T250-SH.T200-SH.T150-SH.T100

Supply and installation of a newly developed, non-toxic, antibacterial wall covering sheets or stripes.

Composed of:

- Shockproof plastic wall covering sheets or stripes made of a newly developed LIFE-BLEND® material. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 1,5 mm.
- With fine embossing for a perfect sanitary protection.
- The joining of the sheets is obtained by using superior finished profiles and vertical and/or horizontal junctions manufactured with the same LIFE-BLEND® material.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Mounted on the wall with appropriate glue, suitable for a perfect seal.

ITEM SPECIFICATIONS

SHP

PRINTED SHEETS

Code SHP.25.1300

PRINTED STRIPES

(cut sheets)

Code SHP.T650 - SHP.T400 - SHP.T300 - SHP.T250 - SHP.T200 - SHP.T150 - SHP.T100

Supply and installation of a newly developed, non-toxic, antibacterial wall covering sheets or stripes.

Composed of:

- Shockproof plastic wall covering sheets or stripes made of a newly developed LIFE-BLEND® material. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 1,5 mm.
- With fine embossing for a perfect sanitary protection.
- The joining of the sheets is obtained by using superior finished profiles and vertical and/or horizontal junctions manufactured with the same LIFE-BLEND® material.
- Transparent plate decorated with non-toxic permanent print. The plate material does not contain cadmium and heavy metals, chlorine, phthalates, bromide, halogens and antimony.
- Mounted on the wall with appropriate glue, suitable for a perfect seal.

SK.100

MEDICAL SKIRTING

Code SK.100

Supply and installation of a 100 mm high, floor / wall connection, with sanitary coving, antibacterial, non-toxic.

Composed of:

- Extruded 100 mm high, shock-resistant newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B-s1,d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- Internal and external angular molded corners, shock-resistant plastic design of new concept LIFE-BLEND®.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Mounted on the wall with appropriate glue, suitable for a perfect seal.

WB.125

BUMPER GUARD WOOD EFFECT

Code WB.125

Supply and installation of elliptical, newly developed, non-toxic, antibacterial, 125 mm high elastic shock-absorbing bumper guards.

Composed of:

- An elliptical 125 mm height, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall with anchor bolts for a perfect seal even with double sheet drywall.
- Complete with end caps and/or external self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- DIP-PRINT wood or material finish effect.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal).

WBH.170

BUMPER HANDRAIL WOOD EFFECT

Code WBH.170

Supply and installation of a newly developed, non-toxic, antibacterial 140 mm high elastic shock-absorbing bumper handrail.

Composed of:

- A tubular 40 mm profile with a diameter and an elliptical 125 mm wide profile with a newly developed shock-resistant LIFE-BLEND® plastic design. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- A colored insert link with a 1,5 mm of thickness between the handrail and the bumper of the same newly developed shock-resistant LIFE-BLEND® plastic material.
- With a smooth finishing on the handrail and fine embossing on the bumper for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance. Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect hand-grip.
- DIP-PRINT wood or material finish effect
- Mounted on the wall using special brackets with a pair of self-centering offset holes, over 63 mm distant from each other for a strong grip on any wall, even on a double sheet drywall, made of the same LIFE-BLEND® material and distant 60 mm from the wall for a perfect hand-grip.
- Complete with end caps and external dovetailed, self-centering corners, inserted into the support for a perfect fit with the cover, produced with the same LIFE-BLEND® material.
- Remade in Italy certified product of 40% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and cover in Life-Blend, 1 terminal in Life-Blend, 1.5 supports in Life-Blend).

WCGL

LIGHT CORNER GUARDS WOOD EFFECT

Code WCGL.25 - WCGL.50

Supply and installation of an antibacterial, non-toxic, shockproof, 50 or 75 or 100 mm wide corner profile.

Available heights: 1200 - 1500 - 2000 - 3000 mm

Composed of:

- A 50 or 75 or 100 mm wide corner bead, shock-resistant, newly developed LIFE-BLEND® plastic profile. Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purposes, with a thickness of 2 mm.
- With fine embossing for a perfect sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- DIP-PRINT wood or material finish effect.
- Mounted on the wall with appropriate glue suitable for a perfect seal.

WHL.40

LIGHT HANDRAIL WOOD EFFECT

Code WHL.40

Supply and installation of a newly developed, non-toxic, antibacterial 40 mm diameter handrail, with a strong grip even on double sheet plasterboard.

Composed of:

- A tubular profile with a 40 mm of diameter, shock-resistant plastic design of new concept LIFE-BLEND® Certified European EN 13823 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purpose, with a thickness of 2 mm.
- With a smooth finish for a perfect hygienic-sanitary protection.
- Wood finish not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall using special brackets, manufactured with aluminium, with two self-centering holes over 47 mm distant from each other for a strong hold on any wall even on a double sheet drywall and has a distance of 57 mm from the wall for a perfect hand-grip.
- Complete with end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the cover, manufactured with the same LIFE-BLEND® material.
- Remade in Italy certified product of 45% of the total weight of the product. The aluminum core is guaranteed to come from recycled aluminum waste (CER 170402) of at least 75% (one 1 meter aluminum bar and Life-Blend cover, 1 Life-Blend terminal, 1.5 aluminum supports).

ITEM SPECIFICATIONS

YHL.40 **LIGHT HANDRAIL ALU** Code YHL.40

Supply and installation of a newly developed, non-toxic, antibacterial 40 mm diameter handrail, with a strong grip even on double sheet plasterboard.
Composed of:

- A tubular profile with a 40 mm of diameter, shock-resistant plastic design of new concept LIFE-BLEND® Certified European EN 1382 and EN ISO 11925-2 "B s1 d0" antibacterial certification for medical purpose, with a thickness of 2 mm.
- With a smooth finish for a perfect hygienic-sanitary protection.
- Plastic pigments not containing cadmium or heavy metals, chlorine, phthalates, bromide, halogens or antimony, are amalgamated with the plastic substance.
- Everything is snapped on mounted onto an extruded seamless aluminium profile with high structural rigidity for a perfect grip.
- Mounted on the wall using special brackets, manufactured in die-cast aluminium, with two self-centering holes over 47 mm distant from each other for a strong hold on any wall even on a double sheet drywall and has a distance of 57 mm from the wall for a perfect hand-grip.
Complete with end caps and internal and/or external self-centering corners, inserted into the support for a perfect fit with the cover, manufactured with the same LIFE-BLEND® material.

YWHL.40 **LIGHT HANDRAIL WOOD EFFECT** Code YWHL.40
